What is BetterBuildings?

- Part of a DOE's Building Technologies Program (BTP) Integrated Efforts
- BTP Vision:
 - The program improves efficiency of existing and new buildings through the development of energy efficiency technologies, strategies, and practices
- Mission:
 - BTP's mission is to develop technologies, techniques, and tools for making residential and commercial buildings more energy efficient, productive, and affordable

The BTP “Eco-System”

BTP Goals Help Steer BetterBuildings

Strategically Focus on High Opportunity Technologies

Maximize potential energy savings (timing, quantitative results, market acceptance)
Accelerate the speed and increase the breadth and savings opportunities of codes and standards improvements
Leverage R&D results to accelerate codes and standards results

Achieve Speed and Scale by Implementing New Innovative Programs

Capture Hearts and Minds by Focusing on Energy Users

Incorporate economics, markets, and behaviors into all BTP Programs
Communicate effectively to build demand for new technologies, products, and markets

Expand Capability

Build technical and leadership skills to sustain long term momentum

What is BetterBuildings?

- BetterBuildings is a U.S. Department of Energy program that is transforming the market and changing the way people think about energy efficiency
- It supports job growth by promoting energy efficiency upgrades in all types of buildings: homes, commercial buildings, schools, hospitals, and more
- Using federal funding and local resources, BetterBuildings is providing hundreds of neighborhoods across the country with easy access to cost-effective energy efficiency improvements
- It offers you a better, more comfortable home, a better business with a stronger bottom line, and a better community

The BetterBuildings Portfolio

- The grant program will ultimately be part of an integrated effort to make buildings across the country better:
 - President Obama's Better Buildings Initiative:
 - Aims to achieve a 20 percent improvement in commercial energy efficiency by 2020, reduce companies' and business owners' energy bills by about \$40 billion per year, and save energy by reforming outdated incentives and challenging the private sector to act
 - Leverage Home Performance with ENERGY STAR®

"Block by block, neighborhood by neighborhood, we will make our communities more energy efficient and help families save money."

Dr. Steven Chu, Secretary
U.S. Department of Energy

Why Build a Brand?

- A brand is a way of presenting, positioning, and talking about a program, product, or concept in order to evoke a certain feeling, action, or behavior among target audiences
- A strong, consistent brand helps ensure that outreach resources are used efficiently to help change behaviors by presenting key stakeholders with clear messaging about the benefits of a program
- The BetterBuildings brand is more than a logo you can put on promotional materials
- BetterBuildings is a concept, a way of thinking about how to use energy efficiency to better our homes, commercial buildings, workforce, communities, and lives

Why Engage With the National Brand?

- Overall, the BetterBuildings brand will build a strong, widespread energy efficiency presence nationwide
- The BetterBuildings brand is a value-add to existing, local branding efforts
 - Can help leverage your marketing budget
 - Association with a national brand devoted to energy efficiency
 - Cost-effective marketing materials to enhance consumer education efforts
 - Facts that help make the case for homeowners and businesses to invest in energy efficiency
 - A smart, helpful, skilled brand that supports a self-sustaining market for building upgrades

BetterBuildings Brand Pillars

- BetterBuildings is about helping people improve their lives
- Find the “Ah Hah”
 - Most people don’t know they have a problem. Find the “Ah Hah” that makes a connection with your audience and establishes the need
- The brand sells benefits, not features
 - Comfort, indoor air quality, and saving money trump caulk and insulation any day

BetterBuildings Brand: Key Insight

- Homeowners:
 - People want to be smart. They do not want to be wasteful. There is power in helping them to “discover” things that allow them to improve their lives and live up to these aspirations. If we help people discover that their homes are leaky and unnecessarily wasting energy, they will realize the ‘status quo’ is not the norm and will want to fix the problem. They will feel smart about what they’ve done, confident about the process, and want to tell others.
- Business Owners/CEOs:
 - Business owners/CEOs want to be smart. They do not want to be wasteful. They also want to save money where possible. If we help them discover that their buildings are leaky and unnecessarily wasting energy (and money), they will realize the ‘status quo’ is not smart business and want to fix the problem. They will feel smart about what they’ve done, confident about the process, and want to tell others.

The BetterBuildings Brand

- What do we do?
 - We help people improve the energy efficiency, comfort, and air quality of their homes and businesses
- What do we believe?
 - Upgrading the energy efficiency of homes is a smart way to create jobs, save energy, and help protect the environment
- Personality:
 - Smart, leader, helpful, skilled
- Visual style:
 - Clean; simple
 - Show people in or outside their homes doing real-life, 'smart' things
 - Show diversity to cover various program targets

The Brand Promise

BetterBuildings will:

- Create a self-sustaining market for energy efficiency upgrades in buildings that results in energy, economic, environmental, and life benefits
- Communicate the benefits of energy efficiency in a compelling, accessible way:
 - Job growth
 - A better life via improved comfort and monetary savings
 - Better energy security, competitiveness, healthy environment, etc.
- Expand the building improvement industry and pave the way for a cleaner energy future
- Make it easier for businesses and homeowners to improve their energy efficiency by providing resources and solutions

Using the Brand

- We encourage all BetterBuildings programs to reference or use the BetterBuildings identity in their own branding and energy efficiency education efforts
 - Use the brand platform to craft messaging and materials
 - Incorporate the BetterBuildings logo somewhere on websites, in promotional materials, during events, or in other forms of outreach
 - Reference the BetterBuildings name in program documents or Web pages that mention what the program is, where it gets its funding, and how it is part of a national movement/effort
 - Use the BetterBuildings messages and factoids in outreach efforts
 - Tailor the branded marketing tools provided by DOE as your own
 - Use the media outreach templates for seasonal outreach and background materials
 - Incorporate Web banners and widgets into online outreach

Using the Brand

- DOE has developed a suite of customizable materials for grantees to use to co-brand their local programs
 - Refined messaging to work into your own outreach
 - Promotional language for websites or brochures
 - Updated logo and color palette
 - Graphic icons and document templates
 - Rewriteable fact sheet with national information about the program
 - Media outreach materials
 - Web tools and more to come
- Using these templates allows you to easily communicate consistent information about the national program and leverage the BetterBuildings brand recognition and credibility

Updated Elevator Pitch

- Brief description of your program
- Most important aspects of the brand

“BetterBuildings is a U.S. Department of Energy program that is transforming the market and changing the way people think about energy efficiency. It supports job growth by promoting energy efficiency upgrades in all types of buildings: homes, commercial buildings, schools, hospitals, and more. Using federal funding and local resources, BetterBuildings is providing hundreds of neighborhoods across the country with easy access to cost-effective energy efficiency improvements. It offers you a better, more comfortable home, a better business with a stronger bottom line, and a better community.”

Key Messaging

- BetterBuildings is both a national energy efficiency program and a smart way of improving your home or business
- Homes and buildings consume 40 percent of U.S. energy and are responsible for 40 percent of greenhouse gas emissions
- Homeowners and businesses don't realize how much money they throw away from wasted energy due to inefficiency
- BetterBuildings helps homes and business save energy, be more comfortable, and improve air quality
- Visit www.betterbuildings.energy.gov for information about energy efficiency in buildings

Consumer Messages

- BetterBuildings is helping consumers make their homes more comfortable and reduce their energy use by making home energy improvements easy and more accessible
- Energy efficiency improvements can result in lower energy bills, better air quality, and increased comfort at home
- You can take simple steps to increase the energy efficiency of your home now; get a home energy evaluation to help identify the next steps for saving energy and improving the comfort and value of your home
- With support from BetterBuildings, we make it easy to make energy efficiency improvements in your home by providing reasonably priced energy evaluations, access to qualified service providers, and financing options and incentives

Business Messages

- Many building owners are paying for energy they don't need due to inefficient mechanical systems and building leaks
- BetterBuildings is helping businesses reduce operating costs by finding cost-effective energy solutions that improve commercial, institutional, and multi-family buildings
- BetterBuildings is helping to create and support jobs in our community by promoting energy efficiency evaluations and improvements to homes and businesses
- BetterBuildings (or program or business name) is a model for other communities (or businesses) interested in promoting energy efficiency

Sample Promotional Text

- BetterBuildings created sample text that program managers can use in websites and other promotional efforts:

“(Name of program) is part of BetterBuildings, which is supported by the U.S. Department of Energy to promote energy efficiency in homes and commercial buildings across the country. Through BetterBuildings, (program name) helps consumers and building owners use energy more efficiently to better our homes, communities, lives, and the economy.”

“Did you know that homes and commercial buildings consume 40 percent of our energy in the United States and are responsible for nearly 40 percent of the country’s greenhouse gas emissions? Our BetterBuildings program, (program name), helps (community name) residents and businesses save money, reduce their energy use, and support local jobs by making smart investments in energy efficiency.”

“For more information about getting a home energy evaluation and financial incentives to help you make energy improvements to your home, visit (program URL). For more information about BetterBuildings, visit www.betterbuildings.energy.gov.””

BetterBuildings Logo

- DOE has enhanced colors to improve the BetterBuildings logo

Contact BetterBuildings@ee.doe.gov to request the new logo for your materials

Proper Logo Usage

Preferred Logo

Two-color PMS 364 and PMS 2748 logo is the preferred usage whenever possible

Black Logo

The one-color black logo is to be used when black is the only available color selection

Reverse Logo

If the logo appears on a colored or black background, it should be reversed as shown

Proper Logo Usage

- The BetterBuildings logo should have “air space” built in around the logo, not touch other copy or graphics directly

- Only the approved logo is acceptable for use; it should not be scaled or skewed, shown without all of its elements, cut off, placed in front of a busy pattern, or recreated with new fonts, colors, or symbols

Sample Program Logo

- Leverage your program's connection to the national program by adding your name to the BetterBuildings logo

Contact BetterBuildings@ee.doe.gov to request a logo with your program name

BetterBuildings for a Better Future

"Block by block, neighborhood by neighborhood, we will make our communities more energy efficient and help families save money."

Dr. Steven Chu, Secretary, U.S. Department of Energy

Homes and commercial buildings consume 40 percent of our energy in the United States and are responsible for nearly 40 percent of the country's greenhouse gas emissions. Performing energy upgrades helps create BetterBuildings and is a smart way to create jobs, save energy, and help protect the environment.

What is BetterBuildings?

BetterBuildings is supporting 41 communities across the country in developing smart energy efficiency programs. Each community is making it easier for consumers to upgrade a home or business with energy efficiency and is expanding the energy improvement workforce.

Making Progress

As of December 2010, more than 2,000 building efficiency upgrades have been completed through the BetterBuildings program, and that's just the beginning. By late 2013, BetterBuildings communities are expected to:

- Conduct energy efficiency improvements in **170,000 buildings**
- Create or retain approximately **30,000 jobs**
- Achieve **15 to 30 percent** energy savings
- Save Americans approximately **\$50 million** annually on their energy bills

Building a Brighter Future

The average American home spends nearly \$2,000 per year on utility bills, but 10 to 20 percent of that energy goes to waste from drafts, leaks, and other heating and cooling problems. Energy efficiency evaluations help homeowners and building operators take the guesswork out of energy improvements.

DOE's BetterBuildings program is working to transform the market for energy evaluations in American homes, commercial buildings, and institutions. With support from BetterBuildings, hundreds of communities across the country now offer discounted energy evaluations, financing options for energy upgrades, and support for a growing, qualified energy efficiency workforce.

betterbuildings.energy.gov

BetterBuildings Impact Across the U.S.

Connect With (Program Name)

Through BetterBuildings, (program name) helps consumers and building owners use energy more efficiently to better our homes, communities, lives, and the economy. BetterBuildings communities make it easy for homeowners to undertake home energy efficiency improvements, by providing energy evaluations, access to qualified service providers, and financing options and incentives to complete upgrades. Contact (program name) to find a qualified energy professional to give your home an energy check-up. A home energy evaluation will identify the next steps for saving energy and provide recommendations for improving the comfort and value of your home, including costs and options for financing them. These energy efficiency upgrades might include adding insulation, sealing cracks, investing in more efficient windows, and improving your home's heating or cooling systems—all improvements that will increase the comfort and value of your home. Visit (program website) for information about (program name).

Rutland County, Vermont

H.E.A.T. Squad Warms Homeowners up to Energy Efficiency

Results as of 03/26/11

2,000

requests for home energy audits

12

businesses needing to hire more employees

7,300

homes to be visited by H.E.A.T. Squad

356

jobs expected to be generated

\$8.7 million

in energy cost savings

With the goal of helping 25 percent of moderate- to low-income households in a county that uses one of the most energy-intensive materials available and energy efficiency, NeighborWorks of Western Vermont (NWV) is working with the team of local contractors that is growing its energy profession to bring NeighborWorks H.E.A.T. Squad to Rutland County, Vermont. Over the next three years, NWV, NeighborWorks and its local partners will visit more than 6,500 homes, conduct 1,000 energy evaluations, and help more than 1,000 households complete their energy efficiency upgrades. In addition to serving as a model for other counties within the state, Rutland County is using \$6.5 million in BetterBuildings seed funding to help take the lead in its energy code.

Breaking on the Heat

Rutland County is known for its stark but beautiful landscape. But these older homes can make fighting energy bills for the residents of Rutland County, which have no natural gas service, an even harder task. Homeowners rarely seek out local contractors because of a perception that they are characterless, expensive and before spending ask clients for NeighborWorks H.E.A.T. Squad, the team missed.

When the H.E.A.T. Squad Energy was introduced to the area, a small-sized pilot program was created by NWV. It was an effort to be successful in the energy efficiency market. It confirmed that the house was being visited in an amount of time, and it decreased the need of energy saving upgrades. In the first few weeks after the program, the firm measured 200 energy savings. Six more requests for audits were added right in the first month. The target was 100.

Neighbor-to-Neighbor Approach

NeighborWorks H.E.A.T. Squad created an initial team of volunteers to work directly with homeowners as a resource source for energy efficiency education and upgrade information. Starting at the kitchen table, the H.E.A.T. Squad gets the conversation rolling with homeowners about the benefits of energy efficiency, what upgrades options are available, and how to make energy programs a part of their lives. H.E.A.T. Squad also provides home assistance by providing a professional energy audit and a complete assessment for the local area of water meter leaks and high efficiency washers.

H.E.A.T. Squad Warms Homeowners up to Energy Efficiency

"We know the program was really helping residents when the most frequent comment was 'you've made it so easy!'"

Luzy Rabin
President, NeighborWorks

When the H.E.A.T. Squad energy was introduced to the area, a small-sized pilot program was created by NWV. It was an effort to be successful in the energy efficiency market. It confirmed that the house was being visited in an amount of time, and it decreased the need of energy saving upgrades. In the first few weeks after the program, the firm measured 200 energy savings. Six more requests for audits were added right in the first month. The target was 100.

Efficiency That Pays for Itself

With the program targeting households that are more likely to have a winter heating season that results in higher energy bills, the program is focused on helping homeowners save money on their energy bills. The \$300 discount offered by energy professionals for home energy evaluations, Rutland County's BetterBuildings program offers a 4.9 percent interest rate for loans up to 10 years. With the loan program, the energy savings pay for the program. Many homeowners are able to pay for the program with their own money.

When it comes to the H.E.A.T. Squad energy program, the team is focused on helping homeowners save money on their energy bills. The program is focused on helping homeowners save money on their energy bills. The program is focused on helping homeowners save money on their energy bills.

How to Work With DOE

- Let DOE help you integrate your program individuality into the BetterBuildings brand
- Learn how to most effectively use the branded templates
- Help DOE understand how your program is using the brand to help maintain an accurate perspective of the brand community as a whole
- Contact BetterBuildings@ee.doe.gov for logo and template approval or for strategic marketing guidance related to these templates

How to Work with DOE

- There are a variety of outlets through which DOE is able to promote your events and achievements
 - Formal announcements
 - Online resources
 - The BetterBuildings website: www.betterbuildings.energy.gov
 - The DOE website: www.energy.gov
 - DOE's Energy Blog: blog.energy.gov
 - Features relatable personal interest stories
 - DOE Twitter accounts
 - Energy bloggers
- Submit material for formal announcements or blog features to BetterBuildings@ee.doe.gov

How to Work with DOE

- Press Releases*
 - Major announcements, funding opportunities, milestones, etc.
 - Written from DOE perspective and issued by Public Affairs Office
- Progress Alerts*
 - Brief release for smaller milestones or funding opportunities
 - Generally do not include a quote from a DOE official
 - Office of Energy Efficiency and Renewable Energy subscriber list
 - Stakeholders and trade publications
 - General public
- Local Statements
 - DOE releases to local media on day of event
 - Includes reusable quote from Secretary Chu or other DOE official

*DOE Office of Public Affairs decides whether announcement is a press release or a progress alert.
