

Deploying HPXML: *Building a framework for the future*

Gavin Hastings
Arizona Public Service

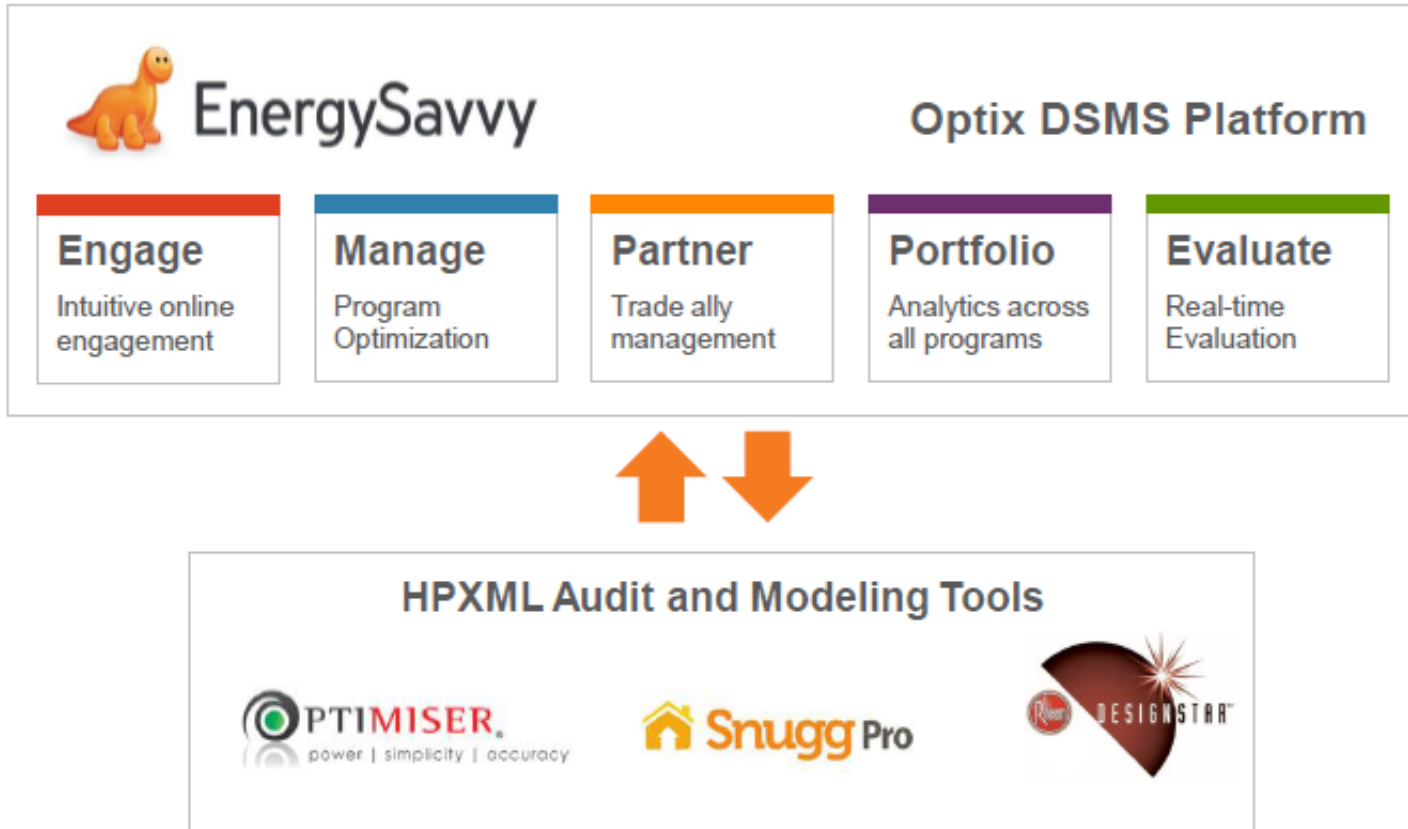

Project Goals:

Drive costs out...

*... while driving innovation
in.*

- Give contractor's choice in tools.
- Reduce transactional costs.
- Increase program flexibility.
- Accelerate program transparency, through better data.

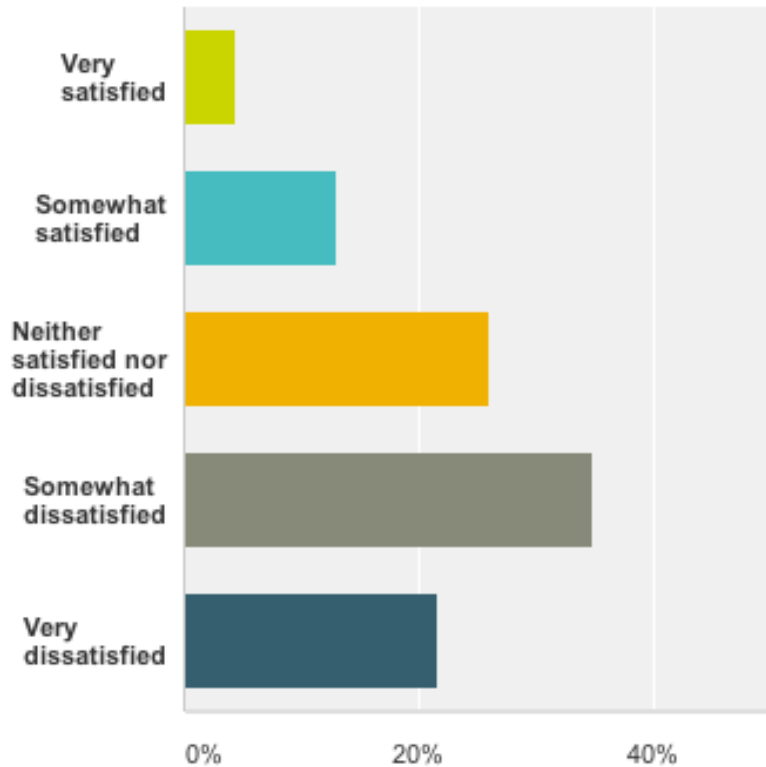

New APS Software Environment

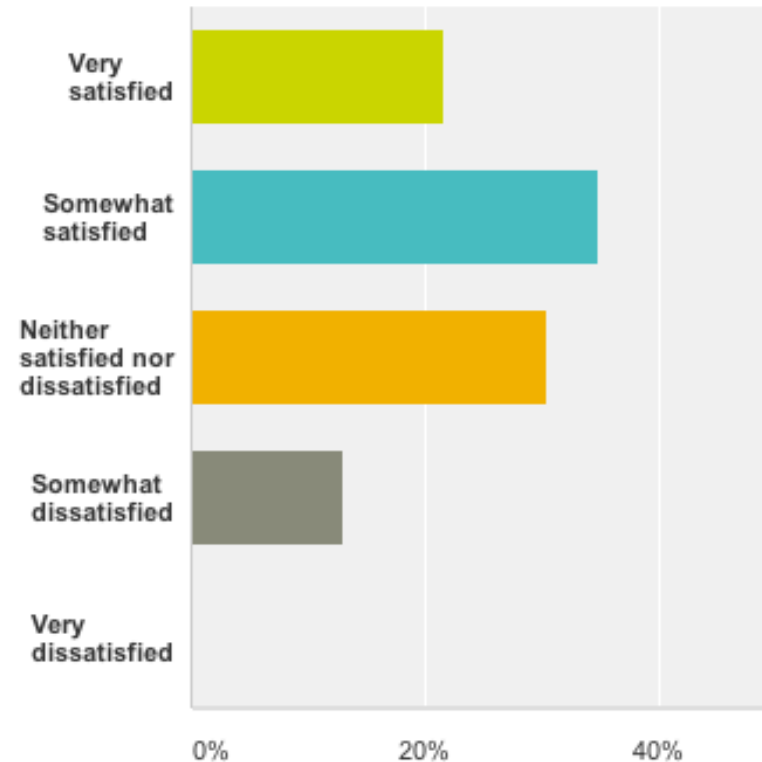

Launched in Nov. 2013: over 2000 HPXML transfers to date.

Result of Our Efforts

Previous Software Environment

New Software Environment

+ reduced administrative time per job by 31%

Things to Remember

Drive costs out...

*... while driving innovation
in.*

- HPXML is a powerful tool and can be adapted to meet your needs.
- Aggressively pursue simplicity.
- Create systems that can evolve **with** the market.
- Data should not flow only one way.
